The Problem

- Explore
- What is the problem?
- The Lack of interest in admission in Technical Education.
- What is the Goal?
- Increase the admission of students in Tech. Education.
- Who will benefit?
- Economy
- Society
-

- Problem Statement

How can we increase the admission of students to technical schools in Alexandria Governate From 29700 to 32700 by 2030

+10% in 4 years

أهداف النسخة الجديدة لرؤية مصر ٢٠٣٠

١ جودة الحياة

٢ عدالة واندماج

٣ اقتصاد قوي

٤ معرفة وابتكار

٥ الاستدامة البيئية

٦ الحوكمة

٧ السلام والأمن

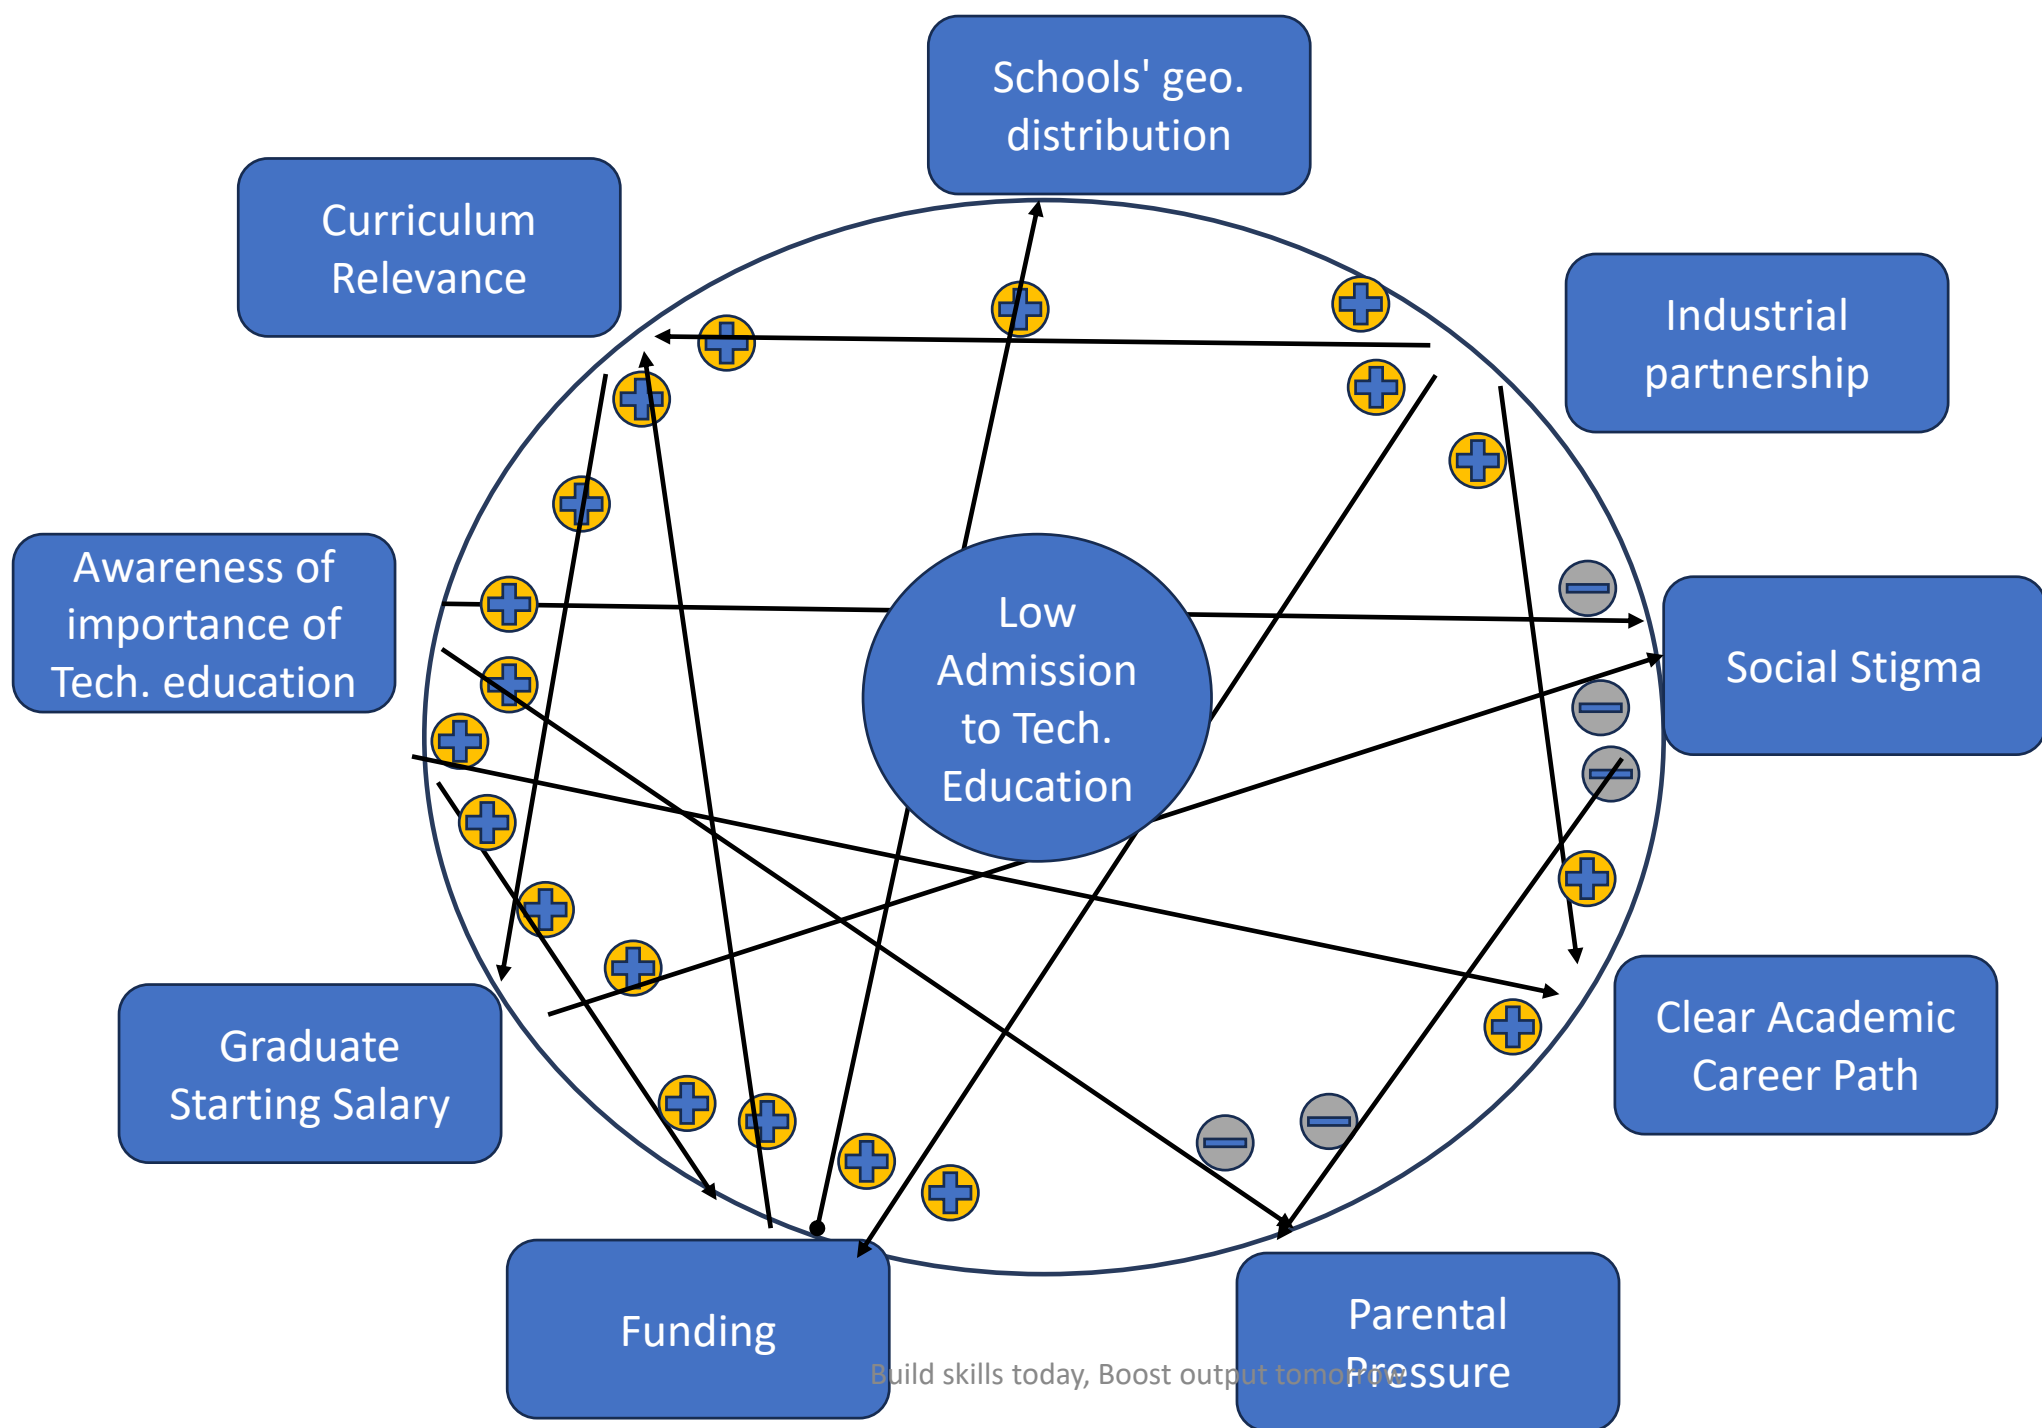

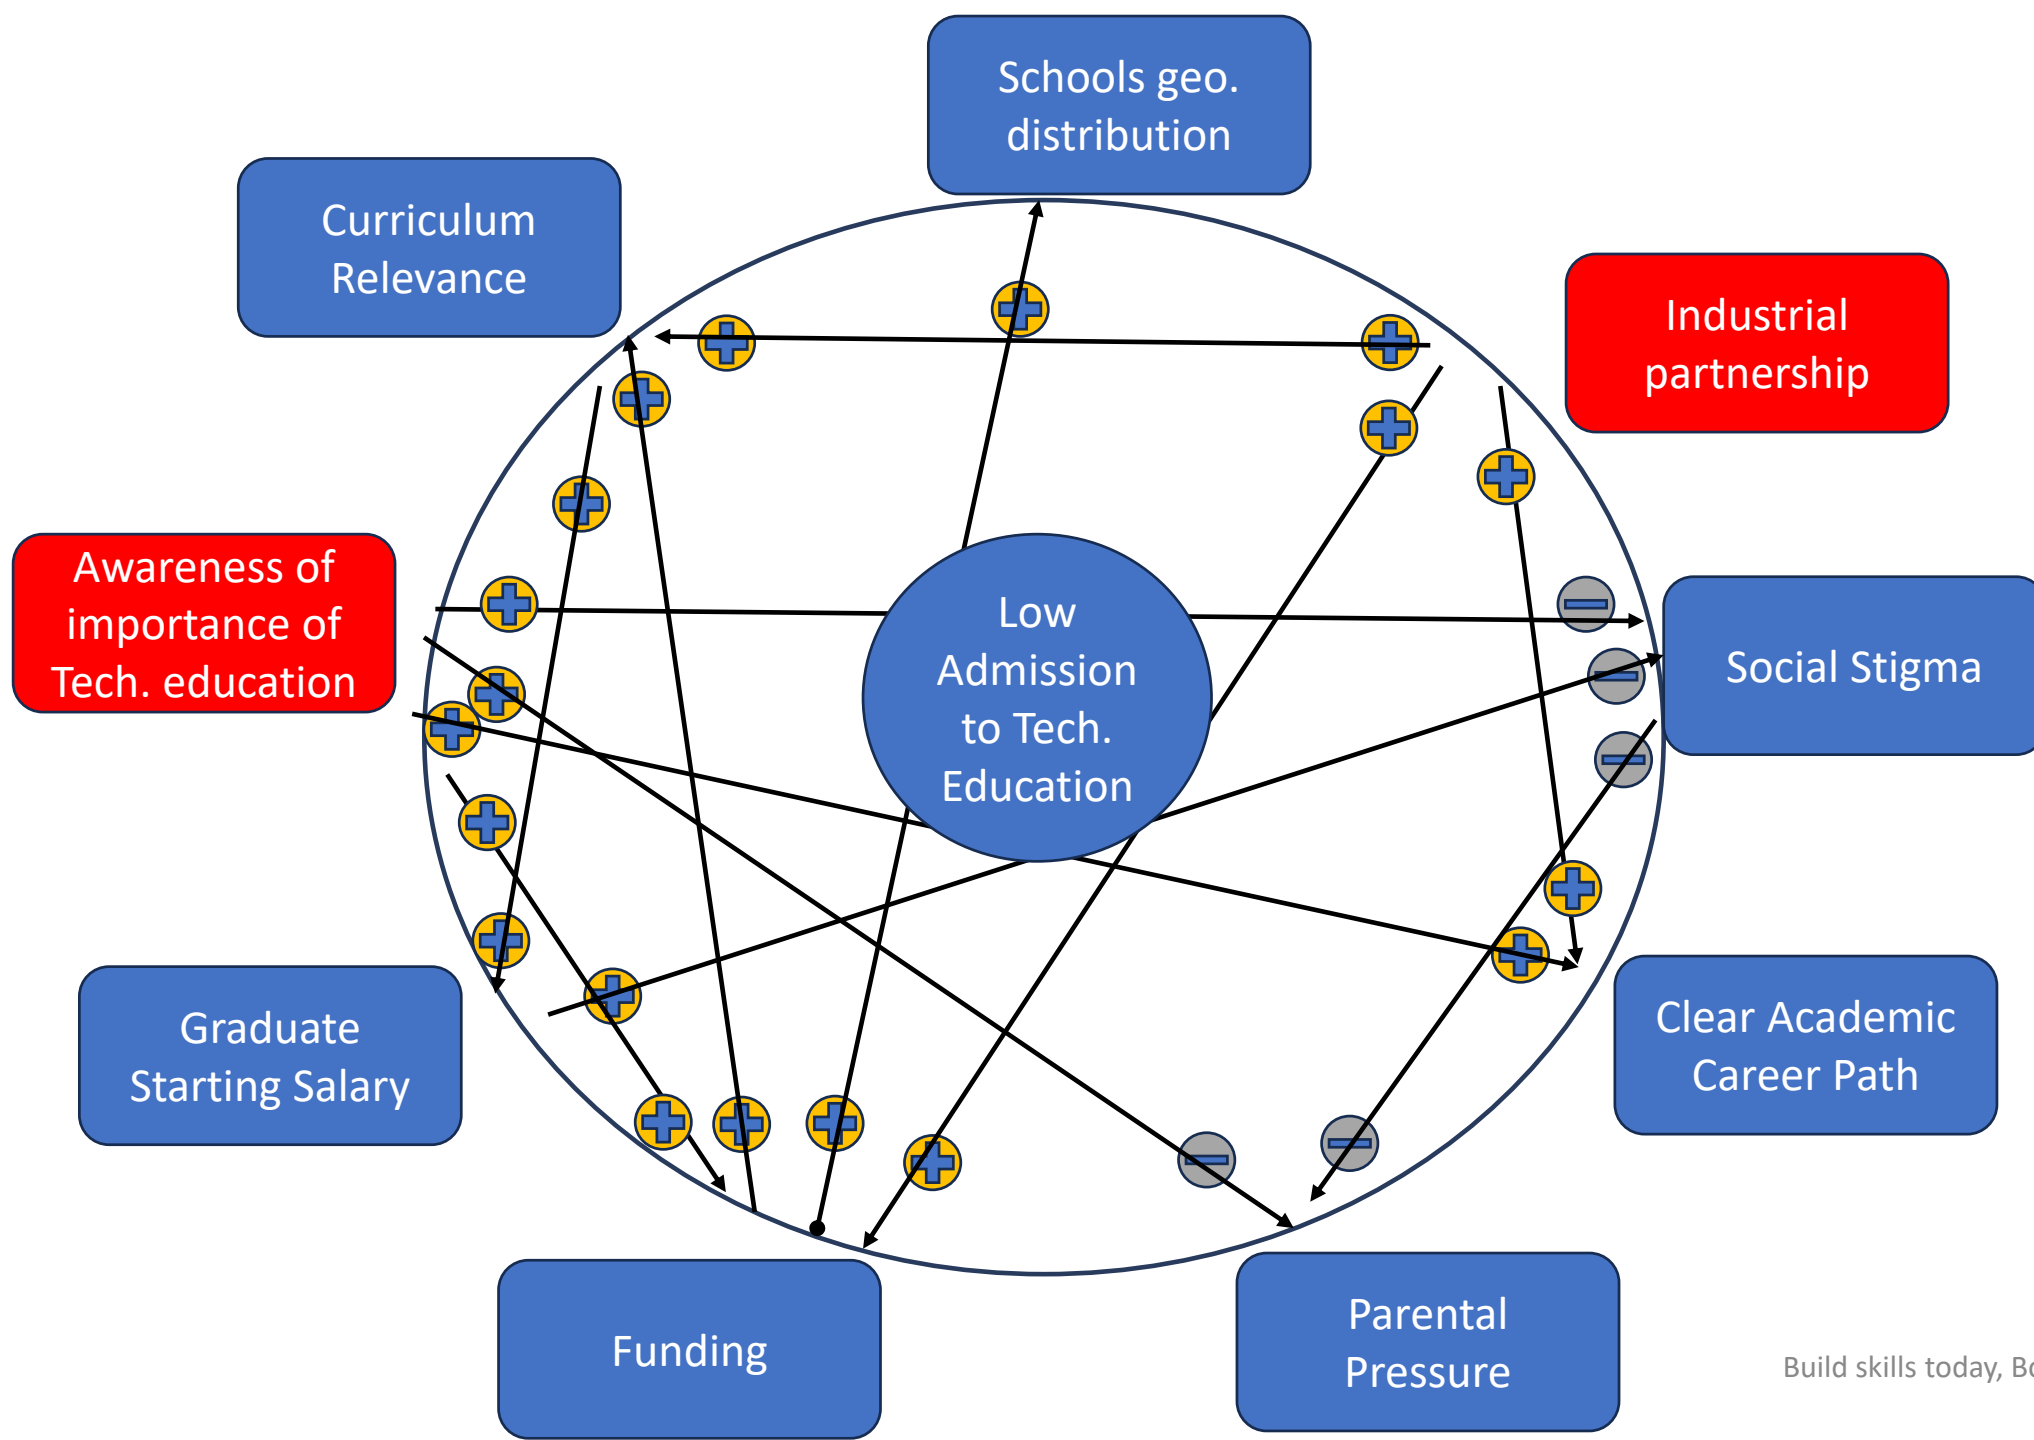

٨ المكانة الريادية

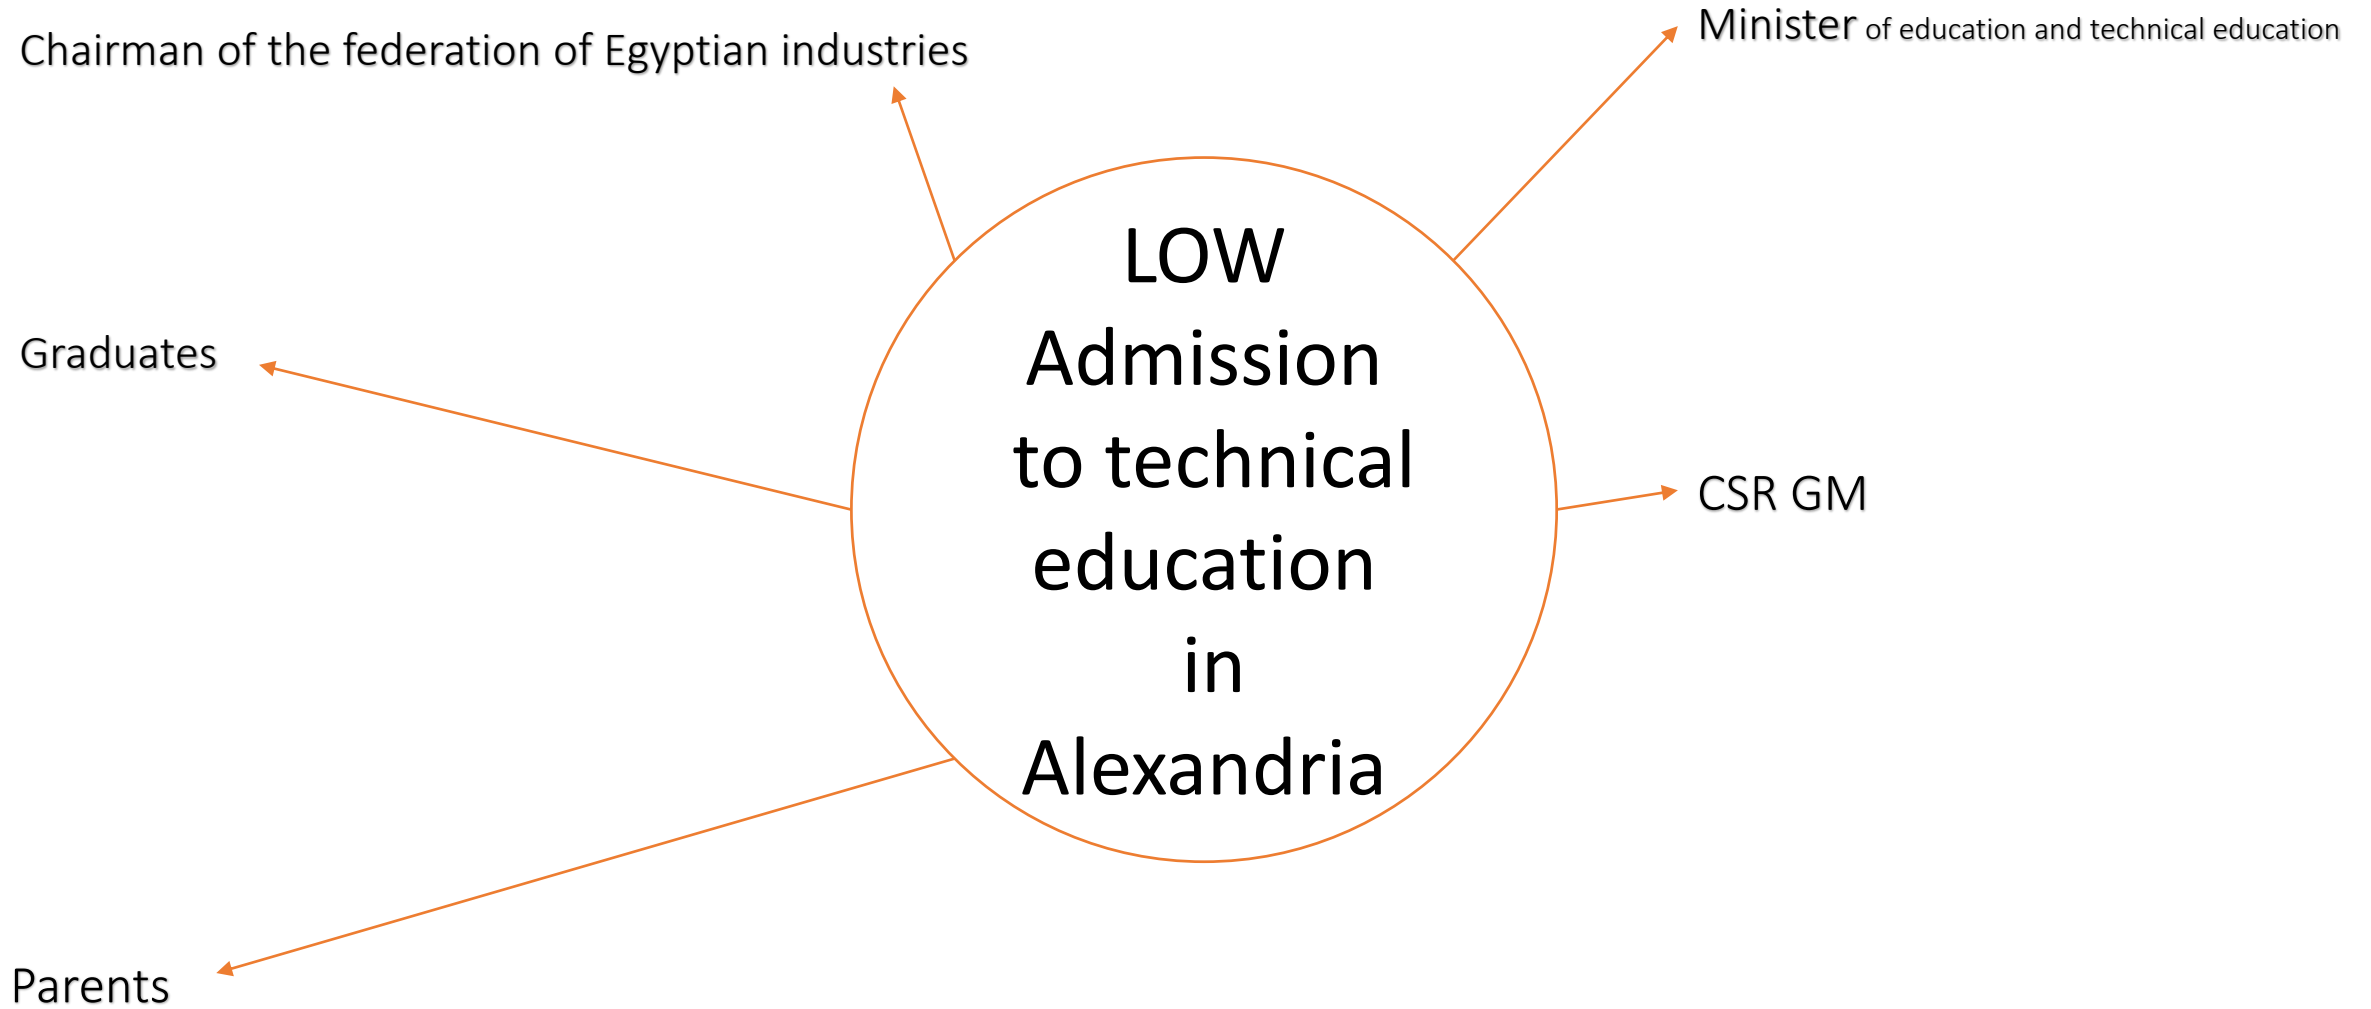

Causes

- What is causing the issue?
- Connections Circle.

LOW Admission to technical education in Alexandria

Chairman of the federation of Egyptian industries

On line workshop

- Technical education is on of the most important pillars for achieving industrial development.

Minister of education and technical education

TV interview.

- “ Technical education has become a national priority. It is essential to redefine the role of the privet sector as a partner for the government to build an educational system that is more flexible and faster in responding to the real economic needs.”

Graduates

Survey

- Weakness and lack of practical training
- Deficiency in curricula
- Weak coordination between education and labor market
- Inadequate funding

CSR GM

Online interview

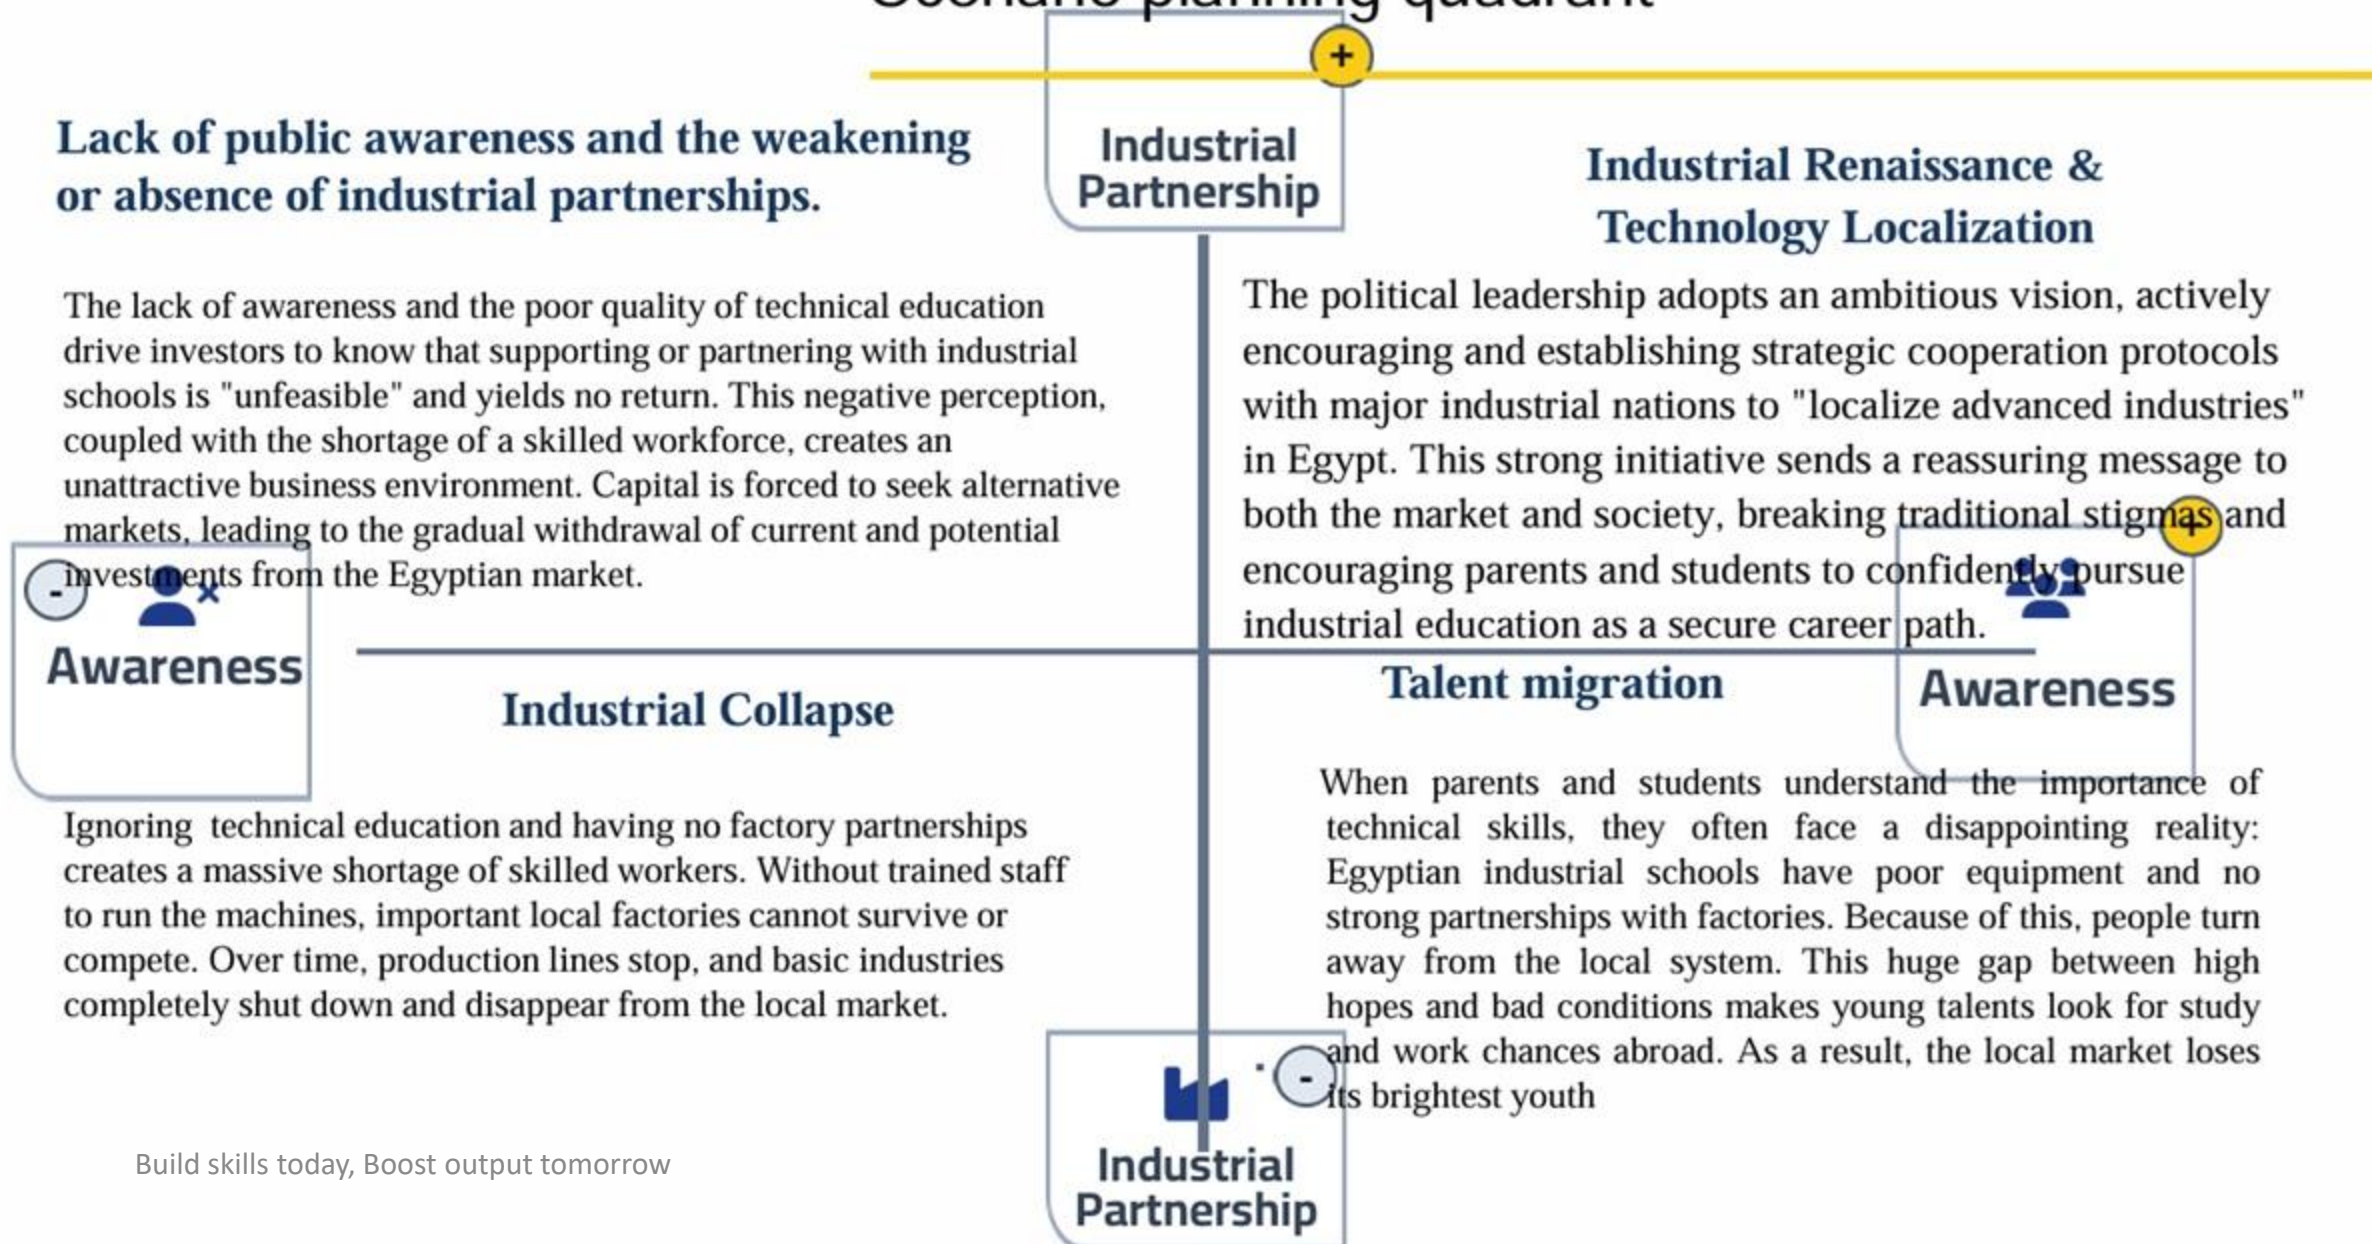

- We are establishing up to 7 schools for technical education to keep up with the transformation with IoT and AI , but for sustainability it needs exempted from tax returns to support funding , also it has the good experience for students to be qualified and to make them cash for companies

Parents

Survey

- All We care about is our children's future and we are not concerned about the certificate it self if it doesn't lead anywhere
- If technical education offers a real career path and guaranteed job opportunities , We would absolutely support it , however , to be completely honest , I am still deeply concerned and hesitant about society's perception and its unfair view of technical education graduates
- We worry that this negative social stigma will impact our child's ambition and how people treat them in the future

Scenario planning quadrant

Feasibility Funnel

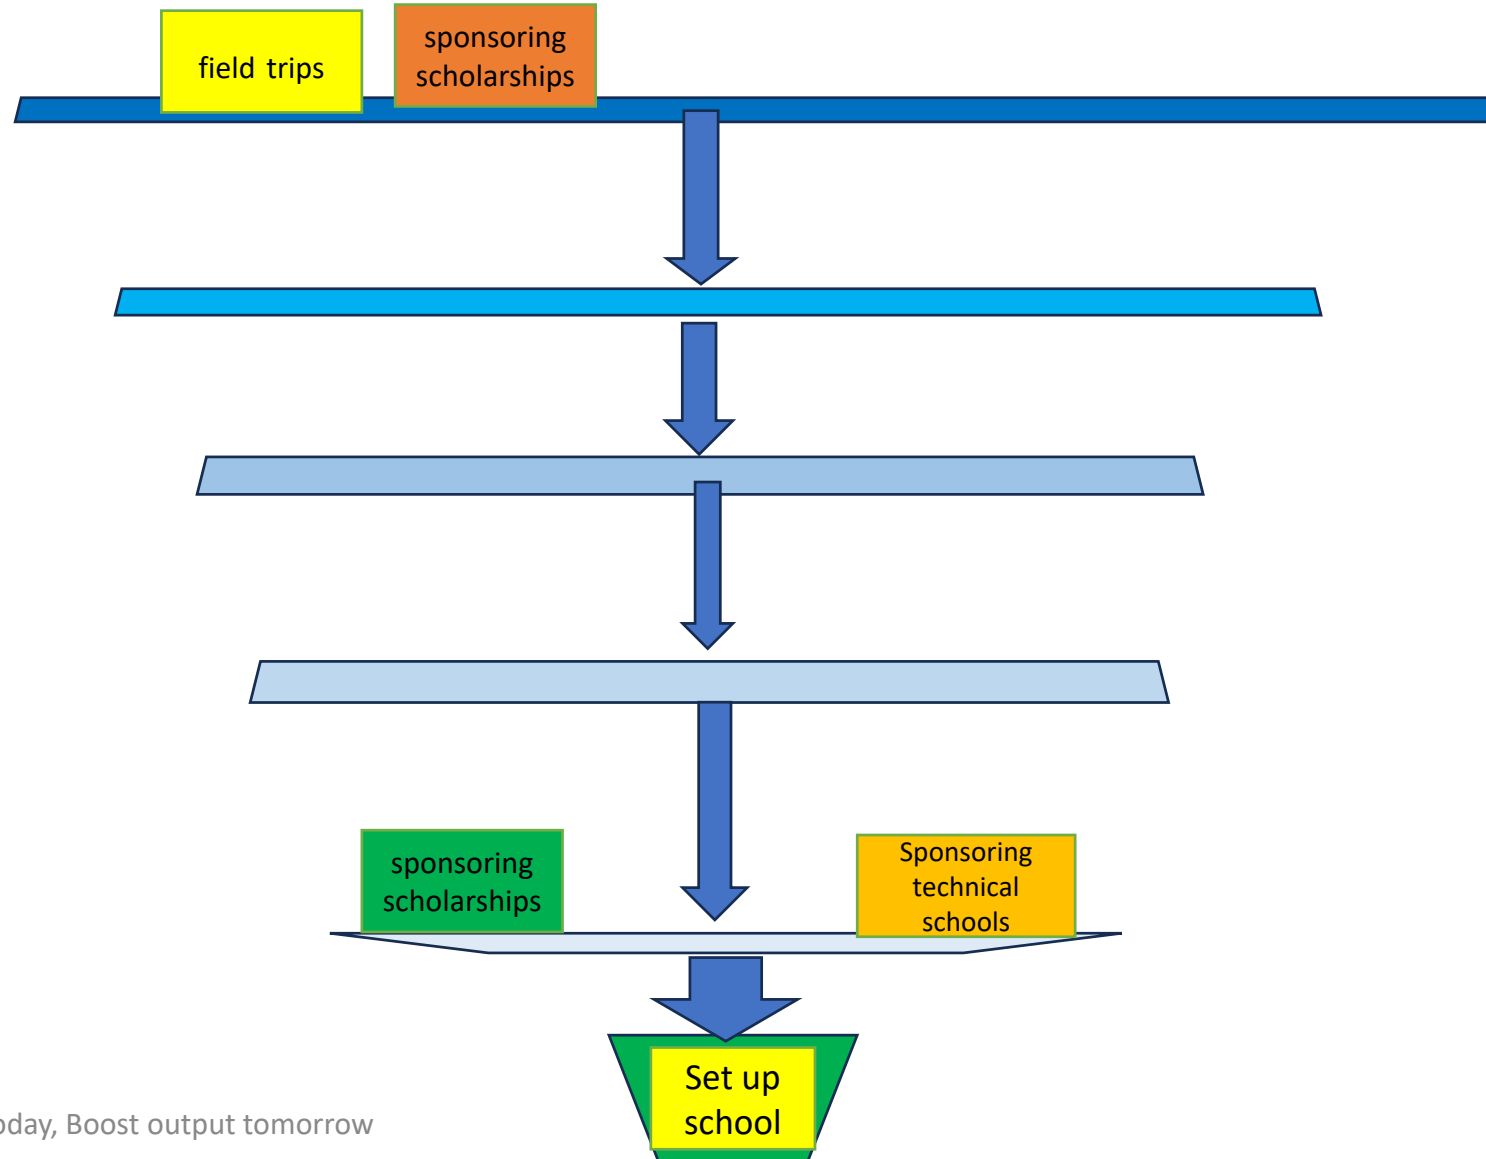

1-can it be
done in
time?

2-can it be
done with
my fund?

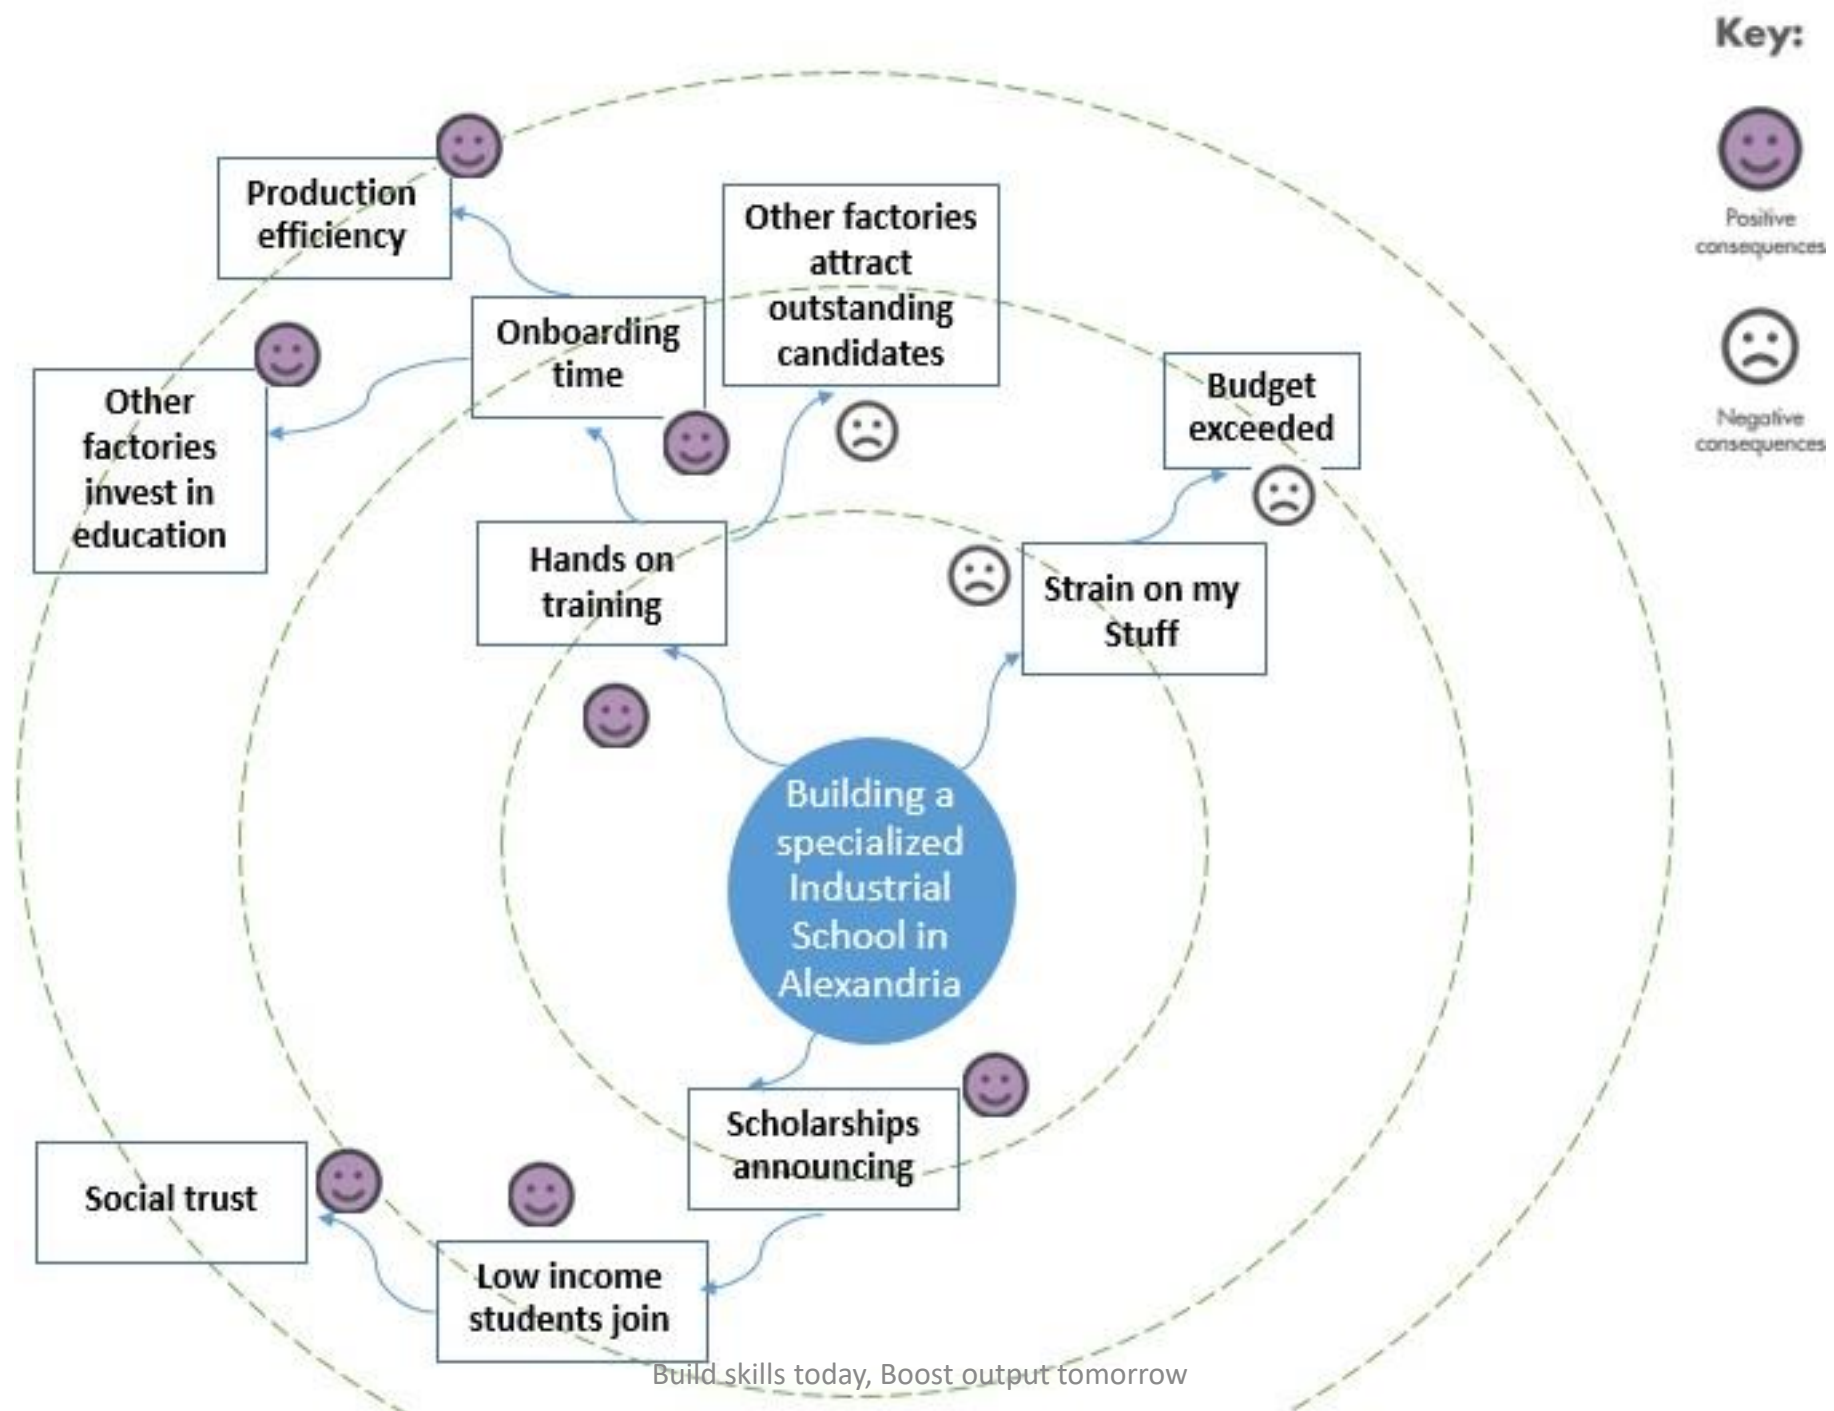

3-is it
scalable?

4-is it Need
expertise?

5-is it
sustainable?
